CAREER OBJECTIVE

I would like to be a part of an organization where I could use and enhance my knowledge and talent for the development of both the organization and myself.

PROJECTS

♦ Car Collection – Full Stack

- Implemented firebase authentication. Private Routes are ensured.
- There is a dashboard for admin who can control all the management systems of the website.
- User can give there feedback and only admin makes another admin on this page

Technology used: React js, React router, Node js, Express, Firebase Authentication, React Bootstrap, MongoDB, Heroku.

[Live Site](#) || [Server Site Code](#) || [Client Site Code](#)

♦ Luckey Delivery – Full Stack

- You can add any item on your cart and see the item on my orders function and also delete your cart item.
- Data loaded from MongoDB. Responsive for all devices.
- Utilized NodeJS to create the REST API and implemented to load the services in the home page.

Technology used: React js, React router, Node js, Express, Firebase Authentication, React Bootstrap, MongoDB, Heroku.
